

THE ALL-NEW EVO

TAKE ANOTHER LOOK...

For nearly 40 years, we've manufactured animal-specific ultrasound right here in the US. Now we've done it again... the next generation of our flagship system, the **NEW EVO**.

With new high-resolution probes, improved image quality and battery performance, the **EVO III** provides veterinary-grade ultrasound in a rugged, portable machine.

- New hi-res probes for *all species*...small animals, equine, bovine, exotic, marine
- Completely redesigned EVO III image software with the latest technology
- Customized, veterinary-specific exam presets, patient management system
- Sunlight-readable hi-res screen, WiFi streaming, headset options
- Durable, splash resistant, and portable—just over 6 lbs
- Field-swappable batteries, improved battery run time
- Engineered with DuraScan® technology—sealed keyboard and probe connections

We are here to stay.
